Call for Papers

INFORMS Telecom 2010

https://www.cirrelt.ca/Informs-Telecom2010/

May 5-7, 2010
Concordia University, Montreal, Canada

Important Dates

Extended abstract submission: ~~January 10, 2010~~ February 15, 2010
Acceptance notifications: March 5, 2010
Camera-ready due: March 19, 2010

Scope

The INFORMS Technical Section on Telecommunications solicits papers and extended abstracts for its tenth biennial conference. The theme of the conference is on large scale optimization tools in telecommunication network design and management. The conference organizers invite you to submit theoretical and applied work that highlights the conference theme. Specific areas of interest include (but are not limited to) network design, network management, data mining, national and international policy making, new technologies and business models, and convergence of digital and mobile technologies.

Keynote Speakers

Antonio Capone, Dipartimento di Elettronica e Informazione, Politecnico di Milano
From pre-planned to self-organizing wireless networks

Mauricio Resende, AT&T Labs Research
Application of metaheuristics in telecommunications

Dominic Schupke, Multi-Layer Networks and Resilience, Nokia Siemens Networks GmbH & Co. KG, Germany

Extended Abstract - Submission Guidelines

1000 words containing no mathematical notation for presentations.
In order to use the submission system, you must first log in and then use the online submission system :
