EURO Journal on Transportation and Logistics

Packing problems arising in transportation and logistics

Aim of the special issue is to provide an insight of the most recent results of the research in new variants of packing and loading problems arising in transportation and logistics applications. In particular, new problems arising in Smart City, Last Mile integration, and City Logistics are welcome, as well as in broader definitions of existing packing and loading problems, including multi-dimensional and multi-attribute problems, integration between packing and routing, and stochastic problems. A special focus will be given to tactical and strategic problems, as well as to the management of uncertainty of the parameters.

Possible topics include (but are not limited to):

- Integration of packing and routing
- Uncertainty management and stochastic packing problems
- Introduction of realistic additional constraints
- Impact of additional operational constraints on packing algorithms
- Generalized packing algorithms
- Multi-attribute packing problems
- Rich and generalized packing problems

In order to submit a paper for a Special Issue, the authors must Log on the editorial manager using the Author Login (<https://www.editorialmanager.com/ejtl/>) and Select Submit New Manuscript in the main menu.

In the drop down list associated with Choose Article Type, select the desired special issue. The entries corresponding to the special issues start with SI.

For any question, please write one of the guest editors.

Deadline to submit manuscripts: 1 February, 2014

Publication date: January 1, 2015

Guest Editors

Manuel Iori, University of Modena and Reggio Emilia, Italy, Manuel.iori@unimore.it

Guido Perboli, Politecnico di Torino, Italy and CIRRELT, Montréal, Canada, guido.perboli@polito.it

Walter Rei, Université du Québec à Montréal (UQAM) and CIRRELT, Montréal, Canada, rei.walter@uqam.ca
