

ISCO 2014 and Spring School in Stochastic Programming (1st announcement)

The 3rd International Symposium in Combinatorial Optimization (ISCO 2014) will take place in Lisbon, March 5-7 2014, in Campo Grande, Lisboa, Portugal.

ISCO is a biannual symposium whose aim is to gather researchers from combinatorial optimization and other related fields of operations research.

Conference Chairs: Luis Gouveia (Univ of Lisbon-CIO) and Ridha Mahjoub (University Paris-Dauphine)

Plenary Speakers: Matteo Fischetti (Univ. of Padova), Martin Grottschel (ZIB-Berlin) and Adam Letchford (University of Lancaster)

Abstract submission deadline: December 15, 2013

This symposium is preceded by a spring school titled "Stochastic Programs with Integer Variables: Theory, Algorithms, and Applications"

School lecturers - Rüdiger Schultz (University of Duisburg) and Jonas Schweiger (ZIB-Berlin)

For more information on the Symposium and School, see <http://ISCO2014.fc.ul.pt/>.

The 12th INFORMS Telecommunications Conference (2014) will also be held from the 2nd to the 4th of March, just before ISCO 2014, also at Campo Grande, Lisbon.

See the registration (to be updated) on a reduced conference for people attending the two conferences.
