Special Issue "Sustainability in Supply Chain Operations and Collaboration in the Big Data Era"

Dear Colleagues,

Supply chain operations involve various business functions and processes in manufacturing, transportation, and retailing, in which the collaboration among supply chain members is a key issue to improve operational performances. In today's Big Data era, supply chain operations in most manufacturing and service enterprises become more data-driven, complex, and global. With ever-increasing competitive pressures, more and more enterprises are aware of the substantial economic, environmental, and social benefits by improving the sustainability in supply chain operations and collaboration. This Special Issue focuses on cutting-edge research that can effectively handle the balances and synergies associated with the integration of economics, environment, and social perspectives into traditional business and decision-making processes in supply chain operations in the Big Data era.

Researchers and practitioners all over the world, from both academia and industry, working in the areas of analytical models, empirical studies, and solution approaches that address significant issues for sustainability in various supply chain operations and their collaboration, are invited to discuss state-of-the-art solutions, novel issues, recent developments, applications, methodologies and techniques. Review papers are also welcomed if they provide new insights to the practice of sustainability in supply chain operations.

Manuscript Submission Information

Manuscripts should be submitted online at www.mdpi.com by registering and logging in to this website. Once you are registered, click here to go to the submission form (<http://www.mdpi.com/user/manuscripts/upload/?journal=sustainability>). Manuscripts can be submitted until the deadline. All papers will be peer-reviewed. Accepted papers will be published continuously in the journal (as soon as accepted) and will be listed together on the special issue website. Research articles, review articles as well as short communications are invited. For planned papers, a title and short abstract (about 100 words) can be sent to the Editorial Office for announcement on this website.

Submitted manuscripts should not have been published previously, nor be under consideration for publication elsewhere (except conference proceedings papers). All manuscripts are thoroughly refereed through a single-blind peer-review process. A guide for authors and other relevant information for submission of manuscripts is available on the Instructions for Authors page. Sustainability is an international peer-reviewed open access monthly journal published by MDPI.

Best Regards

Guido Perboli
